

Cuda Provides Easy Parts Cleaning for the **PRINTING INDUSTRY**

Cuda Automatic Parts Washers use pressurized hot water and industrial detergents to clean parts automatically.

Printers and pressmen know that ink, paper fibers, varnish and lubricants leave a mess and are difficult to clean. Cleaning by hand is not cost efficient, and you can't afford press downtime.

Turn to Cuda Automatic Parts washers and biodegradable detergents, the safe, no-solvent solution to cleaning press parts – automatically. Powerful spray jets blast a solution of hot water and biodegradable detergent from the top, bottom and sides, to thoroughly clean the dirtiest parts — freeing workers to perform other profitable tasks. Motors, blades and buckets clean up in no time, allowing you to get the press back up and earning revenue. Quick and easy to operate, choose the model with a proper size turntable to fit your needs.

Cuda manufactures over 40 models of top-load and front-load automatic parts washers with load capacities ranging from 250 lbs. to 5,000 lbs.
